Stone is a natural product and is subject to variation in colour. Images in this brochure reflect the product under the prevailing climatic conditions during the camera shoot

PAVING SOLUTIONS

www.normanemerson.com

Natural Stone Paving

The Norman Emerson Group has developed a range of Natural Stone Paving to satisfy the growing demand for quality exterior hard landscaping. Natural Stone Paving is ideal for pathways, patios, courtyards and garden focal areas. The range provides a quality solution to the requirement for a natural but practical interface between garden and home.

Uniqueness of Nature

Subtle hues of colour formed from the forces of nature bring a unique earthen beauty to enrich the outdoor experience and lend themselves sympathetically to the natural colours of the surrounding environment. Textured stone brings a timeless character to design which softens the hard surface functionality and is pleasing to the eye. Bring a quality finish to your hard landscaping project that blends with the natural elements of wind, rain, light and foliage to provide the ideal aesthetic solution to paving.

Design

Let your imagination create that unique exterior experience with a combination of paving sizes, cobbles, pattern sets and kerbing. Choose from a Roman or Venetian classical pattern, an ornamental stone circle pattern or a combination of your own design.
